Door-Matching Checklist

Match a new door to the doors you already have, point by point.

Write down what the existing doors have

- [ ] Dominant style family and visible profile: _____
- [ ] Material and core type: _____
- [ ] Slab or pre-hung format: _____
- [ ] Existing width and height: _____
- [ ] Hinges (number, size, finish): _____
- [ ] Jamb and casing style: _____
- [ ] Opening condition — plumb, level and square checked

Match these before you buy

- [ ] Repeat the same panel layout as the doors nearby
- [ ] Use one consistent color across the set
- [ ] Standardise the hardware — same finish, same style family
- [ ] Align the heights and the trim lines with the doors beside it
- [ ] Check the new door against the list above, not against a photo alone

> A door that matches on style but not on hardware or height still looks wrong. Work through both lists before you order.
